

#554

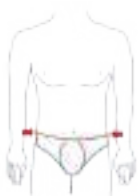

DORSAL-LUMBO-SACRAL MODULAR CORSET

- New design in the scapular area for an improved fit
- The semi-rigid aluminium slats create effective support of the dorsal-lumbar-sacral region of the spine and can be removed
- The rear is fitted with a reinforced dorsal section to prevent movement of the slats away from the paravertebral area
- Contouring at the base of the item for greater comfort
- The shoulder straps are anatomically shaped and lined with soft Radyarn fabric to ensure optimum comfort
- An elastic rear loop simplifies the strap drawing system
- The semi-circular front and small pocket facilitate fastening and adjustment on the abdomen
- Lightweight and easy to wear
- Available in 2 colours (Dark grey - Cream)

INDICAZIONI

- Treatment post traumatic of the dorsal-lumbar-sacral region (outcome of fractures)
- Osteoporosis, osteolysis, osteomalacia of the thoracic region to avoid an excessive dorsal kyphosis
- Protection to the dorsal-lumbar region with an uniform grip of the pelvis
